Title : IBM Midrange Storage
Sales V2

Version : DEMO

1.A customer has been adding NL-SAS Disk Drives to an existing storage system to meet increased demand. As the customer's data grows, the overall application performance decreases.

What is a possible reason for this phenomenon?

- A. The denser disks are increasing latency.
- B. The storage system is overflowing the buffer credits.
- C. The number of sequential read requests is too high.
- D. The storage cache is flushing data to the disks.

Answer: C

Explanation:

(<https://community.emc.com/message/657821>)

2.A customer requires a midrange tape storage solution that has the capability to expand. The customer wants to start with 12 TB and 2x LTO-6 tape drives and be able to grow 5 TB per year.

Which solution meets these requirements?

- A. TS7216
- B. TS3310
- C. TS3100
- D. TS3200

Answer: C

Explanation:

(<http://www.redbooks.ibm.com/redbooks/pdfs/sg245250.pdf>)

3.What is the Solution Assurance (SA) Trigger Criteria and Designated Product List (DPL)?

- A. A list of competitive storage solutions.
- B. A list used to determine if a Technical and Delivery Assessment (TDA) is required.
- C. A checklist of potential problems to avoid when installing an IBM storage product
- D. A list of possible IBM solutions for known customer problems

Answer: B

Explanation:

)

4.A customer needs a high availability solution for its file service infrastructure in an existing IBM Storwize V7000 storage system.

Which solution should you recommend?

- A. Upgrade the IBM Storwize V7000 with advanced copy features
- B. Add an IBM SAN Volume Controller Cluster with IBM Storwize V7000 Unified
- C. Add IBM Spectrum Scale to the IBM Storwize V7000 and replicate to a second system
- D. Upgrade the IBM Storwize V7000 to an IBM Storwize V7000 Unified and add a second IBM Storwize V7000 system

Answer: B

Explanation:

(http://www-01.ibm.com/support/knowledgecenter/ST3FR7/com.ibm.storwize.v7000.641.doc/svc_cluster_highavailability_3qt85g.html)

5.A customer currently relies on tapes for backup purposes and wants an alternative solution to improve the restore performance for critical data.

Which IBM solution should be suggested?

- A. Dedicated IBM SAN switches
- B. IBM Tivoli Tape Optimizer
- C. IBM ProtecTIER TS7620
- D. Additional IBM tape cartridges

Answer: B

Explanation: (<http://www-01.ibm.com/support/docview.wss?uid=swg21142185>)
