Exam : ECBA

Title : Entry Certificate in Business Analysis (ECBA)

Version : DEMO

1.A focus group is a form of which type of research?

- A. Quantitative
- B. Qualitative
- C. Statistical
- D. Theoretical

Answer: B

2.Which of the following techniques is used to identify the elements and boundaries of the requirements architecture?

- A. Functional decomposition
- B. Environmental scan
- C. Scope modelling
- D. Interface analysis

Answer: C

3.In a use case, which is one of the two commonly used relationships?

- A. Inherit
- B. Identify
- C. Distribute
- D. Extend

Answer: D

Explanation:

There are two commonly used relationships between use cases:

Extend: allows for the insertion of additional behavior into a use case. The use case that is being extended must be completely functional in its own right and must not depend on the extending use case for its successful execution. This relationship may be used to show that an alternate flow has been added to an existing use case (representing new requirements). Include: allows for the use case to make use of functionality present in another use case. The included use case does not need to be a complete use case in its own right if it is not directly triggered by an actor. This relationship is most often used either when some shared functionality is required by several use cases or to abstract out a complex piece of logic.

4.Who is responsible for identifying the appropriate elicitation communication channels?

- A. Project manager
- B. Subject matter expert
- C. Business analyst
- D. Business sponsor

Answer: A

5.Which activity is a business analyst (BA) performing when ensuring that a set of requirements is developed with enough detail to be usable by a particular stakeholder?

- A. Validating requirements
- B. Verifying requirements
- C. Eliciting requirements
- D. Specifying requirements

Answer: B
