Exam : **NSE5_FCT-6.2**

Title : Fortinet NSE 5 - FortiClient
EMS 6.2

Version : DEMO

1.Refer to the exhibit.

The screenshot displays two configuration panels for endpoint management. The top panel is for a 'Running Process' rule. It is enabled (Status: ON), applies to Windows, and is configured to require 'Calculator.exe'. The bottom panel is for a 'Vulnerable Devices' rule. It is also enabled, applies to Windows, and has a severity level set to 'Medium'. Both rules are assigned to 'All' endpoints and tagged as 'Sales Department Compliance'.

Based on the settings shown in the exhibit, which two actions must the administrator take to make the endpoint compliant? (Choose two)

- A. Integrate FortiSandbox for infected file analysis.
- B. Enable the webfilter profile
- C. Patch applications that have vulnerability rated as high or above.
- D. Run Calculator application on the endpoint.

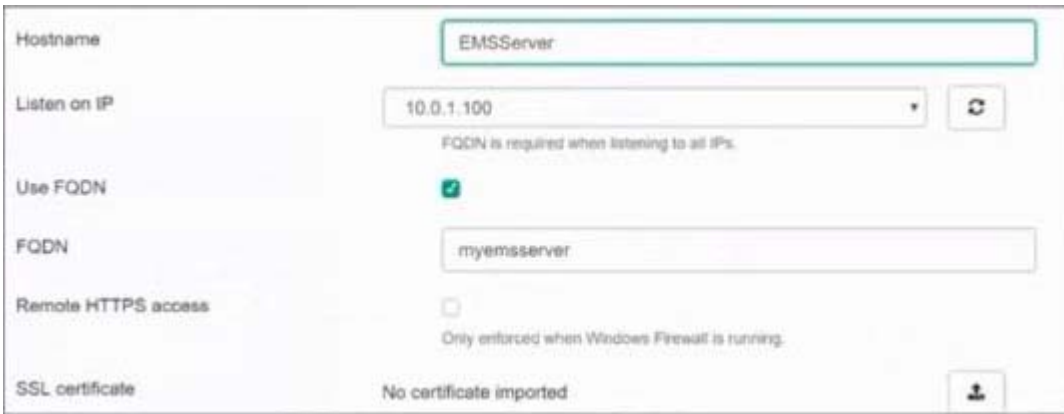

Answer: C,D

2.What action does FortiClient anti-exploit detection take when it detects exploits?

- A. Terminates the compromised application process
- B. Patches the compromised application process
- C. Blocks memory allocation to the compromised application process
- D. Deletes the compromised application process

Answer: A

3.Refer to the exhibits.

Based on the FortiGate Security Fabric settings shown in the exhibits, what must an administrator do on the EMS server to successfully quarantine an endpoint.

When it is detected as a compromised host (IoC)?

- A. The administrator must enable remote HTTPS access to EMS.
- B. The administrator must enable FQDN on EMS.
- C. The administrator must authorize FortiGate on FortiAnalyzer.
- D. The administrator must enable SSH access to EMS.

Answer: A

4.Refer to the exhibit.

Based on the settings shown in the exhibit what action will FortiClient take when it detects that a user is trying to download an infected file?

- A. Blocks the infected files as it is downloading
- B. Quarantines the infected files and logs all access attempts
- C. Sends the infected file to FortiGuard for analysis
- D. Allows the infected file to download without scan

Answer: D

5.An administrator deploys a FortiClient installation through the Microsoft AD group policy After installation is complete all the custom configuration is missing.

What could have caused this problem?

- A. The FortiClient exe file is included in the distribution package
- B. The FortiClient MST file is missing from the distribution package
- C. FortiClient does not have permission to access the distribution package.
- D. The FortiClient package is not assigned to the group

Answer: D
